Lead Computer Systems Analyst

Job duties include: Onis Solutions, LLC in Springfield, NJ is seeking experienced Lead Computer Systems Analysts to lead and coordinate a small team in analyzing, implementing, testing and integrating the enterprise-wide Operations Support Systems (OSS) applications, based on FusionWorks. Individual will ensure that the integration is performed as planned and will verify that the solutions are working or offer recommendations to improve existing systems.

Job responsibilities and duties include:

Oversee Openet Operating Systems (OSS) and databases.

Administer OSS applications supporting all customer divisions.

Participate in full lifecycle of systems engineering activities of high-quality, scalable Mediation, Rating and Billing solutions based on Fusion Works platform (Openet products)

Provide "on call" support to resolve OSS application issues after normal business hours.

Use established change management processes, requiring operational procedures be performed with minimal customer impact, (i.e. during established maintenance window).

Work with Oracle database administrators to configure, tune and maintain Oracle databases in variety of languages.

Document systems configurations and upgrades using Charter Communications tools.

Monitor and assist in managing applications, device availability, network conditions and system reliability and performance, service and program maintenance and storage resources using Charter Communications/Time Warner Channel (TWC) tools.

Install and deliver deliverables on customer site and on-call customer support.

Mentor and review junior engineers.

This position will coordinate and direct the work of at least two (2) consultants.

NOTE: This position has no managerial responsibilities and will not have authority or discretion to make decisions related to hiring, termination, promotion, compensation or performance reviews.

Minimum requirements: Bachelor's degree or higher in Computer Science, Computer Systems, Computer Engineering, Electrical or Electronic Engineering, Information Systems, Management Information Systems, Information Technology, or any related IT or Engineering field of study, plus at least five (5) years of post-degree, progressively responsible experience in any related position(s).

Employer will accept a foreign degree.

Qualified applicants must also have demonstrable proficiency, knowledge, skill and experience with the following:

1. Oracle PL/SQL and Oracle SQL Developer.
2. Shell Scripting (Unix or Linux).
3. Two or more of the following programming languages: Java, C#.Net, ASP.NET or C++.
4. Solaris.
5. TOAD.
6. SOAP UI.
7. JIRA.
8. HP Unix.

Job Site: 7 Bernadette Court, Springfield, NJ 07081

Additional Information:
- No travel; no telecommuting. Position is project-based on long-term assignments at various unanticipated client sites within the U.S. and relocation may be required at the end of each long-term project.
- No phone calls or e-mails.
- Must be legally authorized to work in the United States without sponsorship.
